

Round and V-belt ERO Joint® SK (Self Knot)

(patent pending)

Available in polyurethane or polyester round and V-belt from diameter 6mm and 10x6mm profile.

Delivery in rolls or in pre-cut length.

The joint is made with a simple knot. More resistant than any other welded belt.

With a soldering iron and a U spare paddle, it is possible to weld the sheath to have continue external surface.

Advantages:

Fast and easy assembly. With the ERO Joint® SK solution, you **reduce the intervention time** and production downtime.

The ERO Joint® SK solution is durable, with a high mechanical resistance. The minimum diameter is preserved.
